

Intensive Study Program

Information for partner universities and students

BADEN-WUERTTEMBERG COOPERATIVE STATE UNIVERSITY

The DHBW Villingen-Schwenningen offers Intensive Study Programs upon request. We cooperate with more than 1000 companies and institutions and offer your students the opportunity to explore the professional side of studying at DHBW VS. All our students are also employees and the combination of theory and practise on an academic level is the university's unique feature. Our business companies play a vital role in the Intensive Study Programs: from company visits to round table discussions and lectures by managers and directors – our relationships with the business world are close.

Our partner universities can send us groups of students and choose a one or two-week program offering a variety of modules that best suits their needs.

With two faculties and 17 undergraduate as well as four master programs, we can accommodate requests from all business and social study-related academic backgrounds.

The language of instruction during the Intensive Study Program is English or German. The required language proficiency is B1 (http://www.coe.int/t/dg4/portfolio/?m=/main_pages/levels.html).

The aim of the Intensive Study Program is to provide international groups of student with an insight of professional and academic life in Germany according to the group's individual interest.

Please fill out the form and choose from the modules you are interested in. We will then provide you with a customized Intensive Study Program.
